

BITNOBEL

BTN WHITEPAPER

Version 1.20 • June 2026

Official Website: bitnobel.io

Important Notice

This whitepaper is provided for informational and transparency purposes only. It does not constitute financial advice, investment advice, legal advice, a solicitation, or an offer to buy or sell any digital asset.

Digital assets involve significant risk, including market volatility, liquidity risk, smart contract risk, technological risk, and regulatory uncertainty. All participants should conduct their own independent research and make their own decisions.

1. Executive Summary

Bitnobel (BTN) is an independent blockchain and digital asset ecosystem operating on BNB Smart Chain.

The project is designed around:

- Transparent tokenomics
- Fixed token supply
- Long-term vesting infrastructure
- Public smart contract visibility
- Public GitHub repositories
- Liquidity transparency
- Long-term reserve management
- On-chain verification

Bitnobel focuses on building sustainable blockchain infrastructure supported by publicly verifiable data and transparent documentation.

2. Project Identity

Item	Details
Project Name	Bitnobel
Token Symbol	BTN
Blockchain	BNB Smart Chain
Standard	BEP-20
Category	Digital Asset Ecosystem
Total Supply	100,000,000 BTN
Official Website	https://bitnobel.io

3. Official Links & Public References

4. BTN Token Overview

Parameter	Value
Token Name	Bitnobl
Symbol	BTN
Total Supply	100,000,000 BTN
Decimals	18
Network	BNB Smart Chain
Token Type	BEP-20
Mint Function	None
Transaction Tax	None
Blacklist Function	None
Fixed Supply	Yes

BTN is designed as a fixed-supply digital asset intended to support the long-term development of the Bitnobl ecosystem.

BTN does not implement transaction taxes, reflections, transfer fees, rebasing mechanisms, or inflationary minting functions.

Token Security Overview

Feature	Status
Fixed Supply	Yes
Mint Function	No
Transaction Tax	No
Blacklist Function	No
Ownership Status	Renounced
Public GitHub Repositories	Yes

Feature	Status
Public Vesting Contract	Yes
LP Lock Active	Yes
Treasury Lock Active	Yes
CEX Vesting Active	Yes

This overview provides a quick summary of key token infrastructure and transparency elements.

5. Current Tokenomics Allocation

Allocation	Amount	Share
Vesting Reserve	74,000,000 BTN	74%
Launch Liquidity	20,000,000 BTN	20%
CEX Reserve	5,000,000 BTN	5%
Treasury Reserve	1,000,000 BTN	1%
Total Supply	100,000,000 BTN	100%

Reserve Protection Structure

Bitnobl maintains multiple independent reserve protection mechanisms designed to improve transparency and long-term infrastructure visibility.

Reserve	Amount	Protection Mechanism
Vesting Reserve	74,000,000 BTN	Smart Contract Vesting
Launch Liquidity	20,000,000 BTN	LP Locked Until 27 May 2037
CEX Reserve	5,000,000 BTN	PinkLock Vesting Structure
Treasury Reserve	1,000,000 BTN	PinkLock Treasury Lock

This structure ensures that all major token allocations are publicly visible and protected through independent on-chain mechanisms.

6. Liquidity & LP Lock Transparency

Bitnobl deployed liquidity through PancakeSwap V2 on BNB Smart Chain. LP tokens are locked through PinkLock for long-term transparency.

Item	Value
Pair	BTN / USDT
Liquidity Allocation	20,000,000 BTN
LP Pair Address	0x06210300BEdf6f086D11CAe3A5d1b811D18fd7D5
LP Lock Platform	PinkLock
Lock Status	Locked
Lock Date	27 May 2026

Item	Value
Unlock Date	27 May 2037
Lock Duration	10+ Years

The LP lock is publicly verifiable and intended to support transparency regarding liquidity management.

LP Lock Record: <https://www.pinksale.finance/pinklock/bsc/record/1622839>

Liquidity Security

Bitnobl liquidity infrastructure is supported through a public LP lock extending until 27 May 2037.

The LP lock record, LP pair address, and associated transactions remain publicly accessible for independent verification.

This structure provides transparency regarding the project's liquidity infrastructure while maintaining public visibility of all critical references.

7. Vesting Infrastructure

A total of 74,000,000 BTN is secured within the Bitnobl Vesting Contract. The vesting structure includes a 365-day cliff followed by 40 scheduled 90-day release periods. Each release period unlocks 1,850,000 BTN. The release function is public for transparency.

Parameter	Value
Locked Amount	74,000,000 BTN
Cliff	365 Days
Release Frequency	Every 90 Days
Release Amount	1,850,000 BTN
Total Release Periods	40
Vesting Duration	10+ Years

The vesting contract includes publicly visible functions allowing independent verification of vesting progress.

8. Treasury Reserve Lock

The Treasury Reserve allocation is protected through PinkLock to ensure disciplined use of development funds.

Item	Value
Amount	1,000,000 BTN
Platform	PinkLock
Lock Date	01 Jun 2026
Unlock Date	01 Jun 2027
Status	Locked

The Treasury Reserve supports development, operations, documentation, and ecosystem growth.

PinkLock Record: <https://www.pinksale.finance/pinklock/bsc/record/1628549>

Treasury Reserve Status: Protected Through PinkLock

9. CEX Reserve Vesting Lock

The CEX Reserve allocation is secured through PinkLock vesting with a structured release schedule aligned with exchange listing milestones.

Item	Value
Amount	5,000,000 BTN
Vesting Platform	PinkLock
Cliff Period	6 Months
Monthly Releases	5
Release Amount	1,000,000 BTN per release

PinkLock Record: <https://www.pinksale.finance/pinklock/bsc/record/1628563>

Vesting Structure: 6-Month Cliff + Five Monthly Releases

10. CEX Reserve Vesting Schedule

No CEX Reserve tokens become available prior to the completion of the six-month cliff period.

Date	Amount
01 Dec 2026	1,000,000 BTN
31 Dec 2026	1,000,000 BTN
30 Jan 2027	1,000,000 BTN
01 Mar 2027	1,000,000 BTN
31 Mar 2027	1,000,000 BTN

11. Ownership Renounced

Following deployment and infrastructure completion, ownership of the BTN token contract was permanently renounced.

As a result, ownership-controlled administrative functions are no longer available to the original deployer.

This step was implemented to further strengthen transparency and reduce centralized administrative control.

Renounce Transaction:

[0x5a7da07554eefbff53ad9f82728ca09f067cb7b0876b2dd1d347da337199275b](https://bscscan.com/tx/0x5a7da07554eefbff53ad9f82728ca09f067cb7b0876b2dd1d347da337199275b)

The transaction is publicly recorded and independently verifiable on BNB Smart Chain.

12. Transparency Infrastructure

Bitnobl maintains a transparency framework built around publicly verifiable infrastructure:

- Ownership Renounced
- Public Token Contract
- Public Vesting Contract
- Public GitHub Repositories
- LP Lock until 27 May 2037
- Treasury Reserve Lock
- CEX Reserve Vesting Lock
- Public BscScan Verification
- Public Liquidity References

- Public Market Analytics

Public Infrastructure Overview

Infrastructure Component	Status
Token Contract	Active
Vesting Contract	Active
LP Lock	Active
Treasury Lock	Active
CEX Vesting	Active
GitHub Repositories	Public
Market Analytics	Active
Website Transparency	Active
Ownership Status	Renounced

13. Public Contracts & Wallet References

Category	Address
Token Contract	0x9235134Bafac876b974A3EBcC67BdDA1CDb1404e
Vesting Contract	0xcc5471DcC6ea15E4Eb40a0bD9a7571942b674c62
Treasury Wallet	0xD9e141F30B021A801Babe61D15b596488E6f9F2f
CEX Reserve Wallet	0xA0549Ac5D86f71308ff00c68C885072000a65c83
Vesting Beneficiary Wallet	0xFDb916CDf09A44850d8F483A74B4acB123d0C1D0
Historical Deployment Wallet	0xe7D9d6010C09fEe56D2D4563d4A0068d012b0e6c (Purpose: Historical deployment reference only. Ownership Status: Renounced.)

Contract Verification Status

Contract	Status
BTN Token Contract	Verified on BscScan
Bitnobl Vesting Contract	Verified on BscScan (Exact Match)

Both contracts are publicly accessible and independently verifiable through BscScan.

Official Contract Addresses

Component	Address
BTN Token Contract	0x9235134Bafac876b974A3EBcC67BdDA1CDb1404e
Vesting Contract	0xcc5471DcC6ea15E4Eb40a0bD9a7571942b674c62
LP Pair	0x06210300BEdf6f086D11CAe3A5d1b811D18fd7D5

This makes contract references easier to find.

14. Smart Contract Self-Review Summary

The token contract and vesting contract have undergone internal review and testing. These reviews are intended to increase transparency.

- Fixed Supply Structure
- No Transaction Tax
- No Hidden Transfer Logic
- OpenZeppelin-Based Architecture
- Public GitHub Repositories
- Public Contract Verification
- Public Vesting Infrastructure
- Ownership Renounced

External third-party audits may be considered in the future.

15. Market Analytics

Public market analytics are available through:

- GeckoTerminal
- DEX Screener
- PancakeSwap Analytics
- BscScan Token Tracker

These platforms provide independently sourced market and liquidity information.

These analytics platforms are operated independently from the Bitnobl project and provide external market visibility and transparency.

16. Website & Public Information

The official website maintains public references to:

- Token Contract
- Vesting Contract
- LP Lock
- Treasury Lock
- CEX Vesting Lock
- Whitepaper
- GitHub Repositories
- Timeline & Updates
- Market Analytics

The Bitnobl website serves as a central transparency portal providing access to contracts, documentation, reserve protections, market analytics, and public infrastructure references.

17. Project Timeline & Milestones

Project Timeline

Date	Milestone
27 May 2026	BTN Mainnet Deployment
27 May 2026	Vesting Contract Deployment
27 May 2026	PancakeSwap Liquidity Deployment
27 May 2026	LP Lock Activated
31 May 2026	GeckoTerminal Listing
01 Jun 2026	Treasury Reserve Lock Activated
01 Jun 2026	CEX Reserve Vesting Activated
05 Jun 2026	Ownership Renounced

Future Milestones

- CoinGecko Application
- CoinMarketCap Application
- External Audit
- Additional Ecosystem Integrations

18. Current Project Status

Bitnobl infrastructure currently includes:

- Mainnet Token
- Mainnet Vesting Contract
- LP Lock
- Treasury Lock
- CEX Vesting Lock
- Public GitHub Repositories
- Market Analytics References
- Website Transparency Infrastructure
- Ownership Renounced

Ecosystem Philosophy

Bitnobl is designed around transparency, documentation, verifiable infrastructure, and long-term ecosystem development.

The project prioritizes public visibility of smart contracts, vesting schedules, liquidity references, reserve protection mechanisms, GitHub repositories, and on-chain verification records.

Bitnobl aims to maintain a transparency-first approach while supporting sustainable ecosystem growth through publicly accessible documentation and infrastructure references.

19. Risk Disclosure

Digital assets involve substantial risk. Market conditions, liquidity availability, regulatory developments, technological changes, and other factors may impact project development and token valuation.

Bitnobl does not provide guarantees regarding performance, market value, adoption, or future outcomes.

20. Public Communication Policy

Bitnobl communication focuses on:

- Transparency
- Documentation
- Infrastructure
- On-Chain Verification
- Technical References
- Ecosystem Development

Project communications should not be interpreted as investment advice.

Transparency Scorecard

This section provides a quick transparency overview for readers, exchanges, listing reviewers, and market analytics platforms.

Transparency Item	Status
Ownership Renounced	✓
Vesting Contract Public	✓
LP Lock Public	✓
Treasury Lock Public	✓
CEX Vesting Public	✓
GitHub Public	✓
Market Analytics Public	✓

Future Transparency Goals

The Bitnobl project intends to continue expanding transparency infrastructure through the following initiatives:

- CoinGecko Application
- CoinMarketCap Application
- External Audit Evaluation
- Additional Market Analytics Integrations
- Expanded Documentation
- Enhanced Ecosystem Reporting

These goals are intended to improve public visibility and infrastructure transparency over time.
